_	Box No. I Basis of the report						
1.	. With regard to the language, this report is based on						
		in the language in which it was filed					
	a translation of the internation of a translation furnished for	onal application into , which is the language the purposes of:					
	publication of the internat	er Rules 12.3(a) and 23.1(b)) tional application (under Rule 12.4(a)) examination (under Rules 55.2(a) and/or 55.3(a))					
2.	With regard to the elements* of the have been furnished to the receive report as "originally filed" and are	the international application, this report is based on (replacement sheets which ving Office in response to an invitation under Article 14 are referred to in this a not annexed to this report):					
	Description, Pages						
	1-18	as originally filed					
	Claims, Numbers						
	1-38	filed with telefax on 10.07.2006					
	Drawings, Sheets	Drawings, Sheets					
	1/20-20/20	as originally filed					
	☐ a sequence listing and/or an	y related table(s) - see Supplemental Box Relating to Sequence Listing					
3.	The amendments have resulted in the cancellation of:  the description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (specify): any table(s) related to sequence listing (specify):						
4.	This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).  the description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (specify): any table(s) related to sequence listing (specify):						
	* If item 4 applies, so	ome or all of these sheets may be marked "superseded."					

International application No. PCT/IL2005/000303

		k No. III Non-establishment of opinion with regard to novelty, inventive step and industrial olicability					
t.	The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:						
		the entire international application,					
	⊠ claims Nos. 12-38						
	bec	ecause:					
		the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (specify):					
		the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):					
		the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed (specify).					
	Ø	no international search report has been established for the said claims Nos. 12-38					
		a meaningful opinion could not be formed without the sequence listing; the applicant did not, within the prescribed time limit:					
		☐ furnish a sequence listing on paper complying with the standard provided for in Annex C of the Administrative Instructions, and such listing was not available to the International Preliminary Examining Authority in a form and manner acceptable to it.					
		furnish a sequence listing in electronic form complying with the standard provided for in Annex C of the Administrative Instructions, and such listing was not available to the International Preliminary Examining Authority in a form and manner acceptable to it.					
		□ pay the required late furnishing fee for the furnishing of a sequence listing in response to an invitation under Rules 13 <i>ter</i> .1(a) or (b) and 13 <i>ter</i> .2.					
•		a meaningful opinion could not be formed without the tables related to the sequence listings; the applicant did not, within the prescribed time limit, furnish such tables in electronic form complying with the technical requirements provided for in Annex C-bis of the Administrative Instructions, and such tables were not available to the International Preliminary Examining Authority in a form and manner acceptable to it.					
	<u>п</u>	the tables related to the nucleotide and/or amino acid sequence listing, if in electronic form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.					
		See separate sheet for further details					

International application No. PCT/IL2005/000303

_	Ro	x No. IV	Lack of unity of in	vention				
_								
1.	Ø	In response to the invitation to restrict or pay additional fees, the applicant has, within the applicable time limit:						
	☐ restricted the claims.							
	☐ paid additional fees.							
		paid additional fees under protest and, where applicable, the protest fee.						
paid additional fees under protest but the applicable protest fee was not paid.						applicable protest fee was not paid.		
		□ neith	er restricted the clair	ms nor p	aid additio	tional fees.		
2.		This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.						
3.	This	This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 s:						
	×	complie	d with.					
		not com	plied with for the foll	owing re	easons:			
4.	Cor	Consequently, this report has been established in respect of the following parts of the international application:						
		all parts	i.					
	⋈	the part	s relating to claims N	los. 1-1	1.			
		x No. V	Reasoned statem	ent und	er Article	le 35(2) with regard to novelty, inventive step or industrial

International application No. PCT/IL2005/000303

### Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

PO1593367

[APPROCED FORES 18 SEP 2006]

International application No.

PCT/IL2005/000303

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

#### Re Item III.

Rule 39.1(iv) and Rule 67.1 (iv) PCT - Method for treatment of the human or animal body by therapy: Claims 33-38 disclose a method of treating pelvic organ prolapse which is a method of treatment by therapy.

#### Re Item IV.

The separate inventions are:

- Claims 1-11: an apparatus for treating pelvic organ prolapse comprising a main body and an applicator
- Claims 12-22: an apparatus for treating pelvic organ prolapse comprising a main body and an anchoring body
- Claims 23-32: an apparatus for treating pelvic organ prolapse comprising a thin body which is deformable at least three points thereon.

They are not so linked as to form a single general inventive concept (Rule 13.1 PCT) for the following reasons: the document EP0933069 cited in our search report discloses an apparatus for treating pelvic organ prolapse comprising a main body and an applicator. Beyond this prior art, the special technical features (in the meaning of Rule 13.2 of the P.C.T) left in the independant claims of the application are:

- In independant claim 1: none.
- In independant claim 12: an apparatus for treating pelvic organ prolapse comprising a main body and an anchoring body.
- In independent claim 23: an apparatus for treating pelvic organ prolapse comprising a thin body which is deformable at least three points thereon.
- No same or correspondent special technical feature can be found between claim 1 and claims 12 and 23. There is therefore no technical relationship involving same or corresponding special technical features between claim 1 and claims 12 and 23. In conclusion, the groups of claims are not linked by common or corresponding special technical features and define 3 different inventions not linked by a single general inventive concept. The application, hence does not meet the requirements of unity of invention as defined in Rules 13.1 and 13.2 PCT.

Re Item V.

1

- 1 Reference is made to the following documents:
  D5: EP0274762 (Fortune Capital Management) 20 July 1988 (1988-07-20)
  The documents D5 was not cited in the international search report. A copy of the documents is appended hereto.
- The document D5 is regarded as being the closest prior art to the subject-matter of claim 1 and discloses an apparatus for treating pelvic organ prolapse, comprising a ring shaped main body sized and shaped to apply appropriate pressure on lateral vaginal walls for treating pelvic organ prolapse, the ring shaped main body being flexible.
- The subject-matter of claim 1 thus differs from this disclosure in that the device is foldable at least three different points or along at least two axes, such that insertion of the main body does not have to be precise and that the ring shaped main body naturally settles into the appropriate rotational position for prolapse treatment taking a pre-defined multi-planar shape; and that the device also comprises an applicator enclosing the ring shaped main body for inserting said ring shaped main body into a vagina.

Therefore the subject-matter of claim 1 is new and meets the requirements of Art.33(2)PCT.

- These features serve to insert easily the ring-shaped main body, without having to be precise in respect to the rotational angle of the applicator (and the ring-shaped main body) to the vaginal opening. None of the available prior art documents suggests the combination of said features. In particular, the device described in D5 is hand-deformable, but would, if deformed and inserted into an applicator, stay after insertion in its collapsed state.
  - Therefore claim 1 involves an inventive step and meets the requirements of Art.33(3)PCT.
- The device disclosed in claim 1 is industrially manufacturable and therefore the claim meets the requirements of Art. 33(4)PCT.
- 6 Claims 2 to 11 refer to further embodiments of the device of claim 1 and in view of that meet the requirements of Art. 33(2), (3), and (4) PCT as well.

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

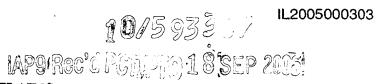

International application No.

PCT/IL2005/000303

#### Re Item VIII.

- Independent claim 1 is in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case is appropriate, with those features known in combination from the prior art (D5) being placed in the preamble (Rule 6.3(b)(i) PCT) and with the remaining features being included in the characterising part (Rule 6.3(b)(ii) PCT). In the present case, the following features are known in combination from the document D5 and belong in the preamble of such a claim:
  - "An apparatus for treating pelvic organ prolapse, comprising a ring shaped main body sized and shaped to apply appropriate pressure on lateral vaginal walls for treating pelvic organ prolapse, the ring shaped main body being flexible."
- 8 The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).

·445/04393 A03

- 1. An apparatus for treating pelvic organ prolapse, comprising:
  - a ring shaped main body sized and shaped to apply appropriate pressure on lateral vaginal walls for treating pelvic organ prolapse,
  - characterized in that the ring shaped main body is flexible, the device being foldable at at least three different points or along at least two axes, such that insertion of the main body does not have to be precise and that the ring shaped main body naturally settles into the appropriate rotational position for prolapse treatment taking a pre-defined multi-planar shape; and,
  - an applicator enclosing the ring shaped main body for inserting said ring shaped main body into a vagina.
- 2. An apparatus according to claim 1 wherein said multi-planar main body extends in three axes.
- An apparatus according to claims 1 or 2 further comprising a device displacer.
- 4. An apparatus according to any of claims 1-3 further comprising a soft external layer located on at least a portion of said main body, said soft external layer adapted to enhance comfort.
- 5. An apparatus according to any of claims 1-4 further comprising a soft external layer located on at least a portion of said main body, said soft external layer adapted to prevent necrosis.
- 6. An apparatus according to claims 4 or 5 wherein the soft external layer is comprised of sponge rubber.
- 7. An apparatus according to any of claims 1-6 wherein said apparatus is at least partially flexible, said apparatus flexible in response to forces applied to it while in the vagina and during removal.
- 8. An apparatus according to any of claims 1-7 which is disposable.

- 9. An apparatus according to any of claims 1-8 wherein said main body is adapted to not directly compress a urethra after said insertion.
- 10. An apparatus according to any of claims 1-9, wherein the ring shaped main body is provided with a varying degree of stiffness along its length enabling the main body to assume the predefined multi-planar shape upon insertion.
- 11. An apparatus according to any of claims 1-9 wherein the ring shaped main body elastically expands into the predefined multi-planar shape upon insertion.
- 12. An apparatus treating pelvic organ prolapse, comprising:
- a main body adapted to provide pelvic organ support when inserted into a vagina; and,
  - an anchoring body, wherein said anchoring body is selectively affixed to said main body.
- 13. An apparatus according to claim 12 wherein said main body is non-planar, extending along three axes.
- 14. An apparatus according to claims 12 or 13 further comprising a device displacer.
- 15. An apparatus according to any of claims 12-14 further comprising a soft external layer located on at least a portion of said main body.
- 16. An apparatus according to any of claims 12-15 wherein said apparatus is adapted to be flexible in response to force applied on said apparatus while in said vagina and during removal from said vagina.
- 17. An apparatus according to any of claims 12-16 which is disposable.
- 18. An apparatus according to any of claims 12-17 wherein said main body is deformable upon the application of a removal force towards a vaginal opening.

- 19. An apparatus according to any of claims 12-18 further comprising an applicator adapted for insertion of said apparatus.
- 20. An apparatus according to any of claims 12-19 wherein said anchoring body is ring shaped.
- 21. An apparatus according to any of claims 12-19 wherein said anchoring body is ovoid.
- 22. An apparatus according to any of claims 12-19 where said anchoring body is multi-sided.
- 23. An apparatus for treating pelvic organ prolapse, comprising:
- a thin main body adapted to provide pelvic organ support when inserted into a vagina, which main body is deformable at at least three points thereon.
- 24. An apparatus according to claim 23 wherein said main body is non-planar, extending along three axes.
- 25. An apparatus according to claims 23 or 24 further comprising a device displacer adapted to impart movement to said apparatus.
- 26. An apparatus according to any of claims 23-25 further comprising a soft external layer located on at least a portion of said main body, said soft external layer adapted to prevent necrosis.
- 27. An apparatus according to any of claims 23-26 wherein said apparatus is adapted to be flexible in response to force applied on said apparatus while in said vagina and during removal from said vagina.
- 28. An apparatus according to any of claims 23-27 which is disposable.

- 29. An apparatus according to any of claims 21-28 wherein said apparatus does not directly compress a urethra upon said insertion.
- 30. An apparatus according to any of claims 1-29 wherein said main body is provided with a hollow lumen, and further comprising:
  - a flexible tube, wherein said tube is attached to said main body and provided with a hollow lumen in fluid contact with said main body hollow lumen;
  - a non-compressible fluid located within the lumen proscribed by said tube and main body; and,
  - a blocking mechanism, wherein said blocking mechanism is slidably located on said tube thereby constraining said non-compressible fluid within said lumen.
- 31. An apparatus according to claim 30 wherein said flexible tube further comprises additional reservoir space, increasing the volume of the lumen proscribed by said tube and main body.
- 32. An apparatus according to any of claims 23-31 further comprising an applicator used for insertion of said apparatus.
- 33. A method of treating pelvic organ prolapse, comprising: inserting into a vagina an apparatus for treating pelvic organ prolapse; and, positioning said apparatus within said vagina wherein said apparatus exhibits a non-planar configuration after said insertion.
- 34. A method according to claim 33 wherein inserting is facilitated by using an applicator.
- 35. A method according to any of claims 33-34 further comprising removing said apparatus from said vagina.
- 36. A method according to claim 35 wherein said removal is facilitated by a device displacer adapted to impart movement to said apparatus.

38. A method according to any of claims 33-37 wherein said positioning does not apply direct pressure to a urethra.
